Project management, Leadership qualities, Ability to work well with teams, Problem-solving and enjoys experimenting with new concepts.

WORK EXPERIENCE

YE Stack Venture Studio (www.yestack.io)   **Kochi, India**
Frontend Engineer   **July 2024 – March 2025**

- Monitored and optimized the software delivery process, ensuring smooth frontend project estimations, testing, and production deployments for web applications. Additionally, enhanced the project testing process by providing valuable feedback to the software testing team, monitoring GitHub issues, recommending testing tools, and improving test automation and QA workflows to ensure higher software quality and reliability.

- Managed all website projects within the company, overseeing the entire lifecycle from planning to deployment.

- Acted as the Technical Project Manager & Developer for company-wide projects, aligning business goals with engineering execution.

- Developed an enterprise-grade Metric Information System (MIS) with SSR, Node.js, Handlebars, and HTMX, optimizing real-time data tracking for multi-role users.

- Architected Teledesk, a Telegram Mini App with React, TanStack Query, and Telegram Bot API, leveraging serverless architecture for optimal scalability.

- Led the migration of a high-traffic WordPress site to Next.js, improving Core Web Vitals by 60% and reducing page load time by 40%.

- Implemented Next SEO strategies, enabling first-page Google search rankings for company blogs, driving 30% more organic traffic.

- Enhanced the project testing process by providing valuable feedback to the software testing team, monitoring GitHub issues, recommending testing tools, and improving test automation and QA workflows to ensure higher software quality and reliability.

TGH Technologies (www.tghtech.com)   **Kochi, India**
Frontend Developer   **Aug 2022 – May 2024**

- Developed over 10 websites and 5 web apps using various frameworks and libraries like Next.js, Vite React, Typescript, Framer motion, Storyblok CMS etc. focusing on providing a high quality user experience and good SEO.

- Developed an admin dashboard using Next.js for a mindfulness coaching app, featuring role-based access control for administrators, HR personnel, and coaches. Used Tanstack Query (react query) and context api for state management across the application.

- Played the role of a Technical Project Manager cum developer for the development of the official company website (tghtech.com).

- Mentored frontend interns, providing guidance and support to foster their professional growth and development.

- Played a key role in the hiring process by conducting interviews and evaluating candidates for frontend developer positions. Saw drastic improvements in the quality of candidates hired.

- Mentored students at TGH Academy, an initiative by the company to train aspiring developers from various educational institutions imparting valuable frontend development skills and contributing to their career advancement.

- Established and led a dedicated department within the company for managing frontend projects, streamlining project management processes and optimizing team performance.
